

## Director of IT at Grow Therapy

Dear Hiring Manager,

I am excited to apply for the Director of IT position at Grow Therapy. The idea of contributing to a fast-growing company that prioritizes both technical excellence and human connection genuinely excites me.

At Verus Investments, I spearheaded the development of our technology strategy and implemented robust cybersecurity initiatives. One of my notable achievements was establishing application security protocols based on the NIST Cyber Security Framework, which reduced security incidents by 30%. This experience has equipped me with the skills necessary to manage and mature a Corporate IT organization. Similarly, at Magnuson Hotels, I revamped booking solutions, enhancing processing speeds by 50%. These accomplishments demonstrate my ability to translate business needs into technical roadmaps and manage SaaS catalogs effectively. I am confident that my background in enterprise IT architecture and cloud infrastructure will be a valuable asset to Grow Therapy.

The prospect of developing a multi-year IT strategy for Grow Therapy is particularly appealing. I am passionate about creating sustainable, long-term plans that not only meet current needs but also anticipate future challenges. My experience at Tahoma Capital, where I minimized downtime incidents by over 20%, has honed my ability to implement IT governance effectively. I am eager to bring this expertise to Grow Therapy, ensuring that our systems are both innovative and resilient.

Thank you for considering my application. I look forward to the possibility of contributing to Grow Therapy's mission and am excited about the potential for us to grow together.

Best regards,

Joe Wilson
