

Vice President of Information Technology at Re:Build Manufacturing

Dear Hiring Manager,

I am excited to apply for the Vice President of Information Technology position at Re:Build Manufacturing. Your mission to revitalize U.S. manufacturing through innovative technology and operational excellence resonates deeply with my professional journey. Growing up in a family of operating engineers, I've always been fascinated by the intersection of technology and manufacturing. Re:Build's rapid growth and commitment to leveraging advanced digital and machine learning solutions are impressive and align perfectly with my passion for driving technological transformation in dynamic environments.

At Verus Investments, where I currently serve as Director of IT & Development, I spearheaded the implementation of a comprehensive data warehousing solution that slashed reporting times by 60%. This initiative not only streamlined operations but also enhanced decision-making processes across departments. Additionally, I established cyber security protocols adhering to NIST's Cyber Security Framework, significantly bolstering our defense against potential threats. My experience in delivering ERP solutions and managing data aligns seamlessly with Re:Build's need for robust IT strategy development and data management.

One of my proudest achievements was during my tenure at REI, where I played a pivotal role in adopting Adobe Experience Manager, which resulted in a 14% boost in site performance. This initiative required a deep understanding of both the technical and operational aspects of the business, skills that I am eager to bring to Re:Build. I thrive in fast-paced, collaborative environments and am confident that my background in IT strategy and leadership in multi-company settings will be an asset to your team.

The opportunity to contribute to Re:Build Manufacturing is incredibly exciting. I am particularly drawn to the company's forward-thinking approach and commitment to growth and innovation. I am eager to leverage my expertise to support your vision and drive technological excellence within your organization.

Thank you for considering my application. I look forward to the possibility of discussing how my background, skills, and enthusiasm can contribute to the continued success of Re:Build Manufacturing.

Sincerely,

Joe Wilson
