

## Director Technology and Innovation at Tanium

Dear Hiring Manager,

I'm excited to apply for the Director of Technology and Innovation role at SSA Marine. The opportunity to lead technology strategy for a global logistics leader like SSA Marine resonates with my career trajectory. My journey with operations began when I orchestrated the creation of a UK-centric sales portal at Magnuson Hotels, witnessing firsthand how technology can revolutionize operations and customer engagement. SSA Marine's commitment to continuous improvement and digital transformation particularly excites me, as it aligns with my professional goals.

In my current role as Director of IT & Development at Verus Investments, I've honed my ability to lead technology strategy and drive substantial improvements. I spearheaded a data warehousing initiative that slashed reporting time by 60%, enabling faster and more informed decision-making. I also implemented comprehensive security protocols based on NIST standards, significantly enhancing our cybersecurity posture. These experiences have equipped me with a robust toolkit for operational technology standardization and innovation management – key aspects of the role at SSA Marine.

Moreover, my tenure at REI as a Senior Web Developer saw the adoption of Adobe Experience Manager, which improved our performance metrics by 15%. This experience underscores my ability to drive digital transformation, ensuring technology solutions are both cutting-edge and scalable. I am particularly enthusiastic about aligning technology strategies with environmental, social, and governance goals, a unique aspect of the Director of Technology and Innovation role at SSA Marine. My strategic thinking and collaborative leadership style will ensure that these initiatives not only meet but exceed the expectations of global terminal operations.

The role at SSA Marine is not just another job for me; it's an opportunity to bring my passion for innovation to a company that values strategic growth and technological excellence. I am eager to contribute to SSA Marine's mission and collaborate with its talented teams to shape the future of global logistics.

Thank you for considering my application. I look forward to the possibility of contributing to SSA Marine's continued success.

Best regards,

Joe Wilson
